

Week 03:

Project: Pixabay.com

Make: Login to pixabay.com. Click on an image. You will recreate this website as it appears to the right. This includes photos icons and type.

Create a pixabay follow-up page using pixabay.com images.

NOTE: Source all of your image from pixabay.com. You'll need 13 images.

1. Add the provided Pixabay logo to the page as the masthead. You'll need to copy and paste it from illustrator.
2. Place and crop all images. You do not need to exactly match the grid on the bottom or sides, but your photos should be evenly spaced and in a grid like the ones shown.

NOTE: Feel free to crop or delete parts of the photos within reason to complete this assignment faster. i.e. place and scale the photo and then use the rectangle marquee to select and delete what doesn't fit.

3. Create shapes and icons. You should use illustrator for the icons. Simply copy and paste them into photoshop when you've completed them.
4. Create the type. You can do type in Photoshop, Illustrator, or a mix of both.

NOTE: Consider using "Acumin Variable Concept" for your typeface.

5. Turn off the background guide layer.

6. Export the assignment as a PDF.
